"So very nice"

Reviewed by: Marthabird on: Nov 27, 2008

"I have painful feet and have trouble getting about. But she was just so nice and ever so patient with me. My feet are doing better and I really feel she cares about me. Her staff is also such sweet girls. Really helpful"

"I didn't see the doctor. But my grandmother fell in the parking lot of the building yesterday and a guy from their office ran out, got her in a wheelchair, and to the ER in a flash. Great people. Took care of my toe."

"I had a really bad ingrown toenail and I was pretty nervous about seeing a foot doctor after the last one I went to. This was totally different. The staff was so great to me. I was only supposed to be there for twenty minutes but I didn't get numb fast enough to have the ingrown part taken out. So they brought me magazines and offered me hot chocolate and were so friendly even though I was taking up so much of their time. And the doctor is just a jewel. I would go back again for sure. Will help your toenails!"

"This doctor will trim your toenails if you have problems with them. I went to three other podiatrists in Eugene and Springfield and most refuse to do routine nail care or treat you like you are a burden to them. I am over 70 and I really need this help. She is such a sweet lady the two girls she has working in her office are really nice too. Best foot doctor ever!"

"I am a marathon runner and had all kinds of issues with my feet, but Dr. Loveland didn't give me lectures about running or what it does to my legs like so many other doctors have. Instead, she focused on the problems and offered good solutions which will keep me running. And her assistant Mary is a ton of fun and really knowledgeable. If you are a runner, this is the place to go. Really good Doctor!"

"I have peripheral neuropathy from diabetes and Dr. Loveland has been brilliant. She

will do anything she can to help and even gave me her phone number after she did a surgical procedure on my foot. She saved my foot for sure! Really good podiatrist"

Reviewed by: evesmith556 on: Aug 13, 2008

"Dr. Loveland is a really good doctor, but she moved her office really suddenly and I had appointment problems. But she is still a really happy and nice doctor. Really good treatment"
